

Swapnil Satpute

I hope you all are doing well in this current situation of COVID-19. Special thanks to Doctors,nurses,police staff ,emergency service providers and other health care workers.

I am Swapnil Satpute I have completed BE Mechanical in the year 2013. Currently I am working with TATA Technologies as a software developer in the Mechanical domain. Don't be confused as I said that completed BE in Mechancial and working as a software developer because this is an area the a lot of mechanical engineers are not aware off.

When I was admitted to Zeal institute in 2009 my family was going through tough times. The only source of income for my family was farming.

During this situation there were many ups and downs in my life but at every state of life I got full support from staff members.Department of mechanical played a vital role in this respect. During a lot of difficulties, may it be technical or non-technical there was a great support from the faculty members. During placement, the staff used to conduct mock interviews which helped in actual interviews.

Considering professional life I have bagged my dream job which is programming in Mechanical domain. Thinking about the future, I always try to update myself to the recent trends in the market and update to the new programing languages.

I would like to thanks to Zeal institute and Mechanical departement for the numerous opportunities bestowed upon me and likewise to share my success story with today's aspirants.

Thanks you.

Stay Home ,Be Safe.
