ABOUT Covid 19

There is no incident in my living memory which drew so much of global attention.

The world has seen deaths of many great peoples, so many tragedies and so many wars but the way this covid 19 has captured the world's population. We have never seen before such dangerous situation. Everywhere everyone is talking about this only, because it concerns everybody, as the whole world seems to have come to halt it feels like we are watching a movie. Because we have seen such things happening in movies. But we are so busy in our everyday life that we never think that these imaginary situation can also become a reality.

So to deal with this situation, what we can do is just to focus on ourselves. We are so blessed that we have got such a big pause in our lives to work on ourselves this is the only way to be the good in your future life. I still believe in one sentence that I used to tell myself "*The best way to predict your future is to create it.*" Yes this is the time when you can actually change your any toxic habits and accept new one. Few things which I started in lockdown:

1. Start reading with 2 pages a day increase as per your interest.
2. Start doing 1 exercise a day to increase as per your body response.
3. Learn a new skill (anything you like the most)
4. Side hustle (plan B for a professionally good future)
5. Eat healthy, stat fit.

My name is Harshad Dharmendra Jagade, Mechanical Engineer graduated from Zeal Education Society.

After Engineering I have faced many problems to be stable is real life situation it was like I was thrown away into the practical world from the heaven I was living during my College life. I have completed engineering with a first class distinction grade. It just took a little push for me to achieve that. My engineering last year became a turning point of my life it shaped as my professional and personal life. Various facilities were made available for all of us in the College itself like GATE preparatory classes, Aptitude sessions various technical and non-technical events, MESA committee which actually taught me a teamwork.

The best part I remember is the College sorted out the students as Mentor and mentee. Prof. Pramod Magade was my second mentor in College life and we had a healthy relation which again helped me to understand the world outside. During the final year academics, Prof. Ajinkya Dhawale would share some of their experiences in real world, opportunities after graduation, importance of having a Business over a job. Prof. Sujit Patil sir taught us how to be more professional at work and how to enjoy sports after working hours. The department motivated us to do internships while summer holidays for professional exposure.

Talking about the events is the best part started in Zeal. Zeal Youth Club and the first event held under was the **Human Flag of India**. I proudly say that I was a part of this wonderful event held on 26th January 2018 and was a huge success. During this event again my extra curricular activities were going awesome. After such a huge success of this event again **MESA** committee had given me an opportunity to be a part of the Core Team for the International Technical Event **NIRMAAN**.

Talking about my professional life is I started with my first job with **Bafna Auto Cars (I) Pvt. Ltd.** Company which is the oldest and biggest Honda Car dealership in Maharashtra. Within one and half year span over there I was a part of team with 4 members which would handle a premium customer for premium cars. Later in October 2019 I shifted my job to an Engineering based company called **MG Seating Systems Pvt. Ltd.** through campus placement. The company basically deals with Defence Vehicle manufacturers like Mahindra Defence, TATA Defence, DRDO, Ashok Leyland, Bharat Forge including some foreign clients like Strait Security Vehicles, Stark Motors, etc. I am as a Business Developer, as per the customers requirements we provide different seating solutions to all of them.

In the future I look forward to a full time business in engineering field. Keeping this in mind I have shifted my job to a well established company to a start-up company recently.

Best wishes to everyone...

Name- Harshad Jagade

Designation - Business Developer

Company - MG SEATING SYSTEM Pvt. Ltd.

Batch - 2017

Branch - Mechanical
