Dear Sir,

We, the Zeal College of Engineering and Research, Pune, are running PG in five disciplines (Mechanical (02 PG courses), Electrical, E&TC, Computer Engineering) and Ph. D programs in E&TC and Mechanical Engineering.

As a part of Ph. D. coursework, we are planning to conduct two expert lectures on the topic "Research and Publication Ethics (RPE)", each of 1.5 hours.

In the second session, I request you to focus a little bit on "How to do research?". There will be around 100 participants (PG students and Research scholars).

In this regard, please convey your suitable dates and timings so that we can plan sessions accordingly. It will be convenient if you conduct the lect on 21.05.21 @4.00PM

Sir, we are waiting for your reply.

Thanking you

A. Overview:

The research & Innovation plays a vital role in development of any country in terms of higher education, industries, roads, airports, dams, mega structures, military applications & up gradation of living standard of human beings. In India, Ministry of human resource development & all India council for technical education has undertaken many research activities such as Research innovation, Research promotion schemes, Intellectual property Right (IPR), Start-up & Incubation cells & Internship etc for higher Education Institutes. Looking into view, the Research & Development Cell of Zeal College of Engineering and Research, Narhe, Pune has organized a Expert Lecture on "Importance of Research in Engineering Research and Publication Ethics" on 21<sup>st</sup> May 2021 during 3.00 P.M. to 5.00 P.M. in association with IQAC cell. Total 77 beneficiaries were actively present and interacted through the meeting. In the beginning of the Expert Lecture, warm welcome was given by Prof.(Dr.) Unde M.G. (Dean R & D cell). He has given the brief introduction of the speaker & importance of research activities for the PG & Ph D students & teaching faculty of engineering.

B. Objective:

The expert lecture was organized to Understand the research & publication Ethics.

Outcomes:

- Inculcate the research activity among the PG students, Ph D students and teaching faculty.
- Understand the Research & Publication Ethics

### C. Events Highlights:

Prof. Dr. Parikshit Mahalle had focussed on –

## What is National Policy on Academic Ethics?

### 1. Introduction

Ethical practice is essential in every kind of academic activity. Any violation of basic ethics will affect the value and credibility of the activity being carried out, whether it is teaching or research or administration.

Different areas of academic work, such as work involving human or animal subjects, medicine, engineering etc. may have their own, detailed and specific codes of ethics, but the essence of those guidelines should be aligned with the norms mentioned in this document. These guidelines should be required to be read and accepted by every member of the institution.

### 2. Policy of ethical conduct:

#### Teaching and research

- The selection and training of students should involve a just and fair procedure. During tests and interviews there can always be subjective judgments; however they must avoid any considerations unrelated to the student's academic ability.
- During teaching, the dignity of the classroom/laboratory should always be maintained.
- Cheating in tests and exams is never acceptable.
- Through their own actions, mentors must communicate positive ethical values and professionalism to their students.
- Every institution must have fair procedures for proper use and sharing of equipment and facilities.
- Many ethical norms in research, such as guidelines for authorship, copyright and patenting policies, data sharing policies, and confidentiality rules in peer review, are designed to protect intellectual property interests while encouraging collaborate.

### Ethical Decision Making in Research

Although codes, policies, and principals are very important and useful, like any set of rules, they do not cover every situation, they often conflict, and they require considerable interpretation. It is therefore important for researchers to learn how to interpret, assess, and apply various research

rules and how to make decisions and to act ethically in various situations. The vast majority of decisions involve the straightforward application of ethical rules.

### What is Research Misconduct ?

- **Fabrication:** Making up data or results and recording or reporting them.
- **Falsification:** Manipulating research materials, or changing or omitting data or results such that the research is not accurately represented in the research record.
- **Plagiarism:** The appropriation of another person's ideas, processes, results, or words without giving appropriate credit.
- Research misconduct does not include honest error or differences of opinion.

UGC established the Consortium for Academic and Research Ethics (CARE) to identify and list legitimate and good quality journals. The 'UGC-CARE Reference List of Quality Journals' has now been made available. INSA, IAS, NASI, INAE.

**ISSN:** International Standard Serial Number is an eight-digit serial number used to uniquely identify a serial publication, such as a magazine, journals.

**ISBN:** International Standard Serial Number: An ISBN is a 13-digit code which identifies a specific edition of a book title from one specific publisher and is unique to that edition

### D. Contents during sessions:

#### Where to publish the research paper?

UGC has established the journals for academic research publications called the Consortium for Academic and Research Ethics (CARE) to identify and list legitimate and good quality journals. The 'UGC-CARE Reference List of Quality Journals' has now been made available. INSA, IAS, NASI, INAE.

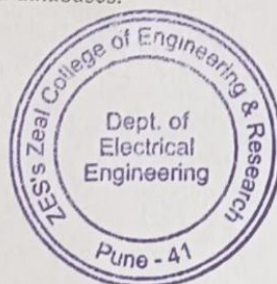

Refer the website for UGC care Journals [www.https://ugccare.unipune.ac.in](http://www.ugccare.unipune.ac.in) The UGC-CARE List has only TWO groups, instead of the original FOUR groups to simplify the search process. These are NOT hierarchic or ranked groups.

UGC-CARE List Group I

Journals found qualified through UGC-CARE protocols

UGC-CARE List Group II

Journals indexed in globally recognized databases.

The UGC-CARE List is dynamic. If any good quality journal is missing, it may be submitted by following the prescribed process. If any undeserved journal is found anywhere in the List, it may kindly be reported through feedback option. The UGC-CARE List is classified into

i) Sciences ii) Social Sciences iii) Arts and Humanities and iv) Multidisciplinary based on / II Science Journal Classification (ASIC) codes, which are created and maintained by Scopus (Elsevier Science).

UGC-CARE List Group II Journal consists of  
Web of Science

1. Arts & Humanities Citation Index.
2. Science Citation Index Expanded.
3. Social Sciences Citation Index.

Scopus

1. Scopus Source List

In his lecture, he stated not to send the research paper / article for more than one publication at a time. That makes the review of paper cumbersome. Do not copy the others research work. Go for research literature review/ survey. Find the gaps, learn the methodology / software tool for research work. Review the work of other researcher thoroughly. Find the higher mathematics & tools required for research. Always, write your research work in good / standard globally accepted English language. Keep the plagiarism as per instructions. How to right the copy right form.

Further it is asked visit Google scholar score. What is H- index, I- index & G- index score. What is impact factor of journal?
