(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE Curriculum Structure and Syllabus of

F.Y. B. Tech. – Artificial Intelligence and Data Science

(With effect from - Academic Year 2024- 25)

VISION OF THE INSTITUTE

To be a premier institute in technical education by imparting academic excellence, research, social and entrepreneurial attitude.

MISSION OF THE INSTITUTE

- To achieve academic excellence through innovative teaching and learning process.
 - To imbibe the research culture for addressing industry and societal needs.
 - To inculcate social attitude through community engagement initiatives.
 - To provide conducive environment for building the entrepreneurial skills.

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

VISION:

To promote quality education with a strong foundation of Artificial Intelligence and Data Science Engineering that enables self-development, entrepreneurship, and intellectual property to become a successful IT Professional.

MISSION:

- M1: To empower students for developing intelligent systems and innovative products through academic excellence.
- M2: To produce competent computer professionals to serve the needs of the society by preserving human core values.
- **M3:** To provide research culture and conductive environment for entrepreneurship and to solve industry needs.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs):

- **PEO1:** To provide graduates with the proficiency to utilize the fundamental knowledge of basic sciences, mathematics, Artificial Intelligence, data science and statistics to build systems that require management and analysis of large volume of data.
- **PEO2:** To enrich graduates with necessary technical skills to pursue pioneering research in the field of AI and Data Science and create disruptive and sustainable solutions for the welfare of ecosystems.
- **PEO3:** To enable graduates to think logically, pursue lifelong learning and collaborate with an ethical attitude in a multidisciplinary team.

PROGRAM OUTCOMES (POs):

- **PO1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2: Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3:** Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO4:** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

ZEAL COLLEGE OF ENGINEERING & RESEARCH, PUNE – 41

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

- **PO5:** Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6:** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7:** Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9:** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11: Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12: Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs):

- **PSO1:** Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, networking, artificial intelligence and data science for efficient design of computer-based systems of varying complexities.
- **PSO2:** Problem-Solving Skills- The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.
- **PSO3:** Successful Career and Entrepreneurship- The ability to employ modern computer languages, environments and platforms in creating innovative career paths to be an entrepreneur and to have a zest for higher studies.

ZEAL COLLEGE OF ENGINEERING & RESEARCH, PUNE – 41

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

	Voltage and current division. Application in Computer Systems: Importance of power supply circuits and basic energy management in computing devices. Case Study: Analysis of household wiring systems and identifying safety concerns in real-world wiring.	
2.	AC Circuits and Power: AC Fundamentals: Sinusoidal waveforms: amplitude, frequency, and phase. RMS and average values. AC Circuit Components: Impedance in AC circuits (resistors, inductors, and capacitors). Power in AC Circuits: Real power, reactive power, apparent power, and power factor. Electricity Consumption Calculation: Calculation of electricity consumption for households and industries, Power transmission and distribution basics. Application in Computer Systems: Role of AC circuits in computer power supplies and transformers. Case Study: Analysis of electricity bills for homes and small industries, Understanding tariff systems, energy consumption patterns, and energy-saving techniques.	7
3	 Electrical Machines and Power Consumption: Basics of Electrical Machines: Transformers, AC motors, DC motors, and their applications. Working Principles: Single-phase and three-phase systems, Transformer efficiency and losses. Energy Meters and Billing: Introduction to energy meters used in billing systems, Energy-saving techniques in industrial and residential settings. Application in Computer Systems: Usage of transformers and motors in power supply and cooling systems of computers. Case Study: Optimizing electrical energy consumption in industries: How to reduce power costs by using efficient machines and improving power factor. 	7
4.	Semiconductor Basics and Applications: Introduction to Semiconductor Materials: Properties of intrinsic and extrinsic semiconductors. PN Junction Diode: Structure, working principle, and characteristics. Applications of Diodes: Rectifiers (half-wave, full-wave) and voltage regulation using Zener diodes. Application in Computer Systems: Use of diodes in voltage regulation, switching, and protection circuits for computers. Case Study: Design and analysis of a simple rectifier circuit used in a DC power supply for electronic devices.	7
5.	Transistors and Amplifiers:Introduction to Transistors: Bipolar Junction Transistors (BJTs) and Field EffectTransistors (FETs). Working Principles: BJTs and FETs configurations(common-emitter, common-source). Transistor Amplifiers: Operation, biasing,and applications.Application in Computer Systems: Role of transistors in switching circuits andsignal amplification in computing devices.Case Study: Designing a simple amplifier circuit for an audio system using atransistor and understanding the real-world challenges in amplifier design.	7
6.	Digital Electronics Fundamentals: Number Systems: Number systems (Binary, Octal, Decimal, Hexadecimal), Binary arithmetic (addition, subtraction, multiplication, division), Character representation (ASCII, Unicode). Logic Gates, De Morgan's Laws, Boolean	7

Course	Course Contents:											
Unit	Description							D1 (iration Hrs.)			
1.	Introduction to HTML:Terminologies used in Web Design: World Wide Web (www), Web Pages, WebSite, Web Browsers, Web Servers and types of sites. Static vs. dynamic web sites,Search Engine. Web page structure: DOCTYPE, HTML, TITLE, HEAD, BODYand other meta tags with attributes. Block Level Elements: Headings, Paragraphs,Breaks, Divisions, Centered Text, Block Quotes, Preformatted text, types ofAddress, HR tag. Horizontal Rue. Text Level Elements: Bold, Italic, Teletype,Underline, Strikethrough, Superscript, Subscript, DIV tag, displaying special							eb s, Y s, of e, al	10			
2.	characters, comments.Lists and Links:Lists: Ordered Lists, Unordered Lists, Definition Lists, Nested Lists.Links: Absolute, Relative and Inline links, use image as link, link to an email address, button as link, types of links, linking various documents for internal and external links, to link different web page of same site, link different location on the same web page, a specific location on different web page of same site, to specific section within the document, inserting E-mail link											
3.	Images, Colors Image: Types of alignment, HSP as a link, Insert using other attri	and Backgr image forma ACE, VSPA ing Images, butes with IN	round: at, jpg, bmp, CE, wrappin formatting AG tag.	, png gif et ng text, he image foi	c. IMG tag ight and w r sizing, a	g, alternato idth of im lignment.	e text, imag aages, Imag Border ar	ge ge id	9			

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

	Colors and Backgrounds: The text color, color attribute of FONT tag, text attribute of BODY tag. bgcolor attribute of BODY tag, changing link colors: link, alink, vlink, attributes of BODY tag, Backgrounds: Inserting image as page background, background attributes of BODY tag, creating solid color page background.	
4.	Table, Frames and Forms:Table: Table tag with attributes. TABLE, , >, tags. Border, cellspacing, cell padding, width, align, bgcolor attributes. Adding captions: CAPTIONtag Formatting contents in the table cells: align, valign, bgcolor, height, width,nowrap attributes. Spanning rows and columns: rowspan and colspan attributes.Frames: Types of Frames with their attributes, Creating frames: FRAMESET tag- rows, cols attributes, FRAME tag – name, frame border, margin height, marginwidth, src, resize, scrolling Attributes, Use of NOFRAMES tag, Frame targeting.Forms: Creating basic form: FORM tag, action and method attributes, Form fields:Single line text field, password field, multiple line text area, radio buttons, andcheck boxes. Pull down menus: SELECT and OPTION tags. Buttons: submit, resetand generalized buttons. Formatting technique: Using table to layout form.	10
5.	Cascading Style sheets: Cascading Style Sheets: Different types of Style Sheets, Benefits of using CSS. Adding style to the document: Linking to style sheets, Embedding style sheets, Using inline style, Selectors: CLASS rules, ID rules. Style sheet properties: Font, text, box, color and background properties; Creating and Using a simple external CSS file; Using the internal and inline CSS; background and color gradients in CSS Setting font and text in style sheet using table layout.	9
6.	Website Hosting: Website Hosting: Concept of Internet and Intranet. Publishing website on Intranet, installing and configuring web server, uploading files on intranet site, access intranet-based website, publishing website site on Internet, hiring web space, uploading files using FTP, virtual hosting, access internet-based website.	9
	TOTAL	56
List of	f Experiments:	
1.	Create web page using structure tags to display sample message.	
2.	Create a web page for displaying a paragraph using formatting tags, HR tags.	
3.	Create a web page using text level and border level tags.	
4.	Design a web page for implementing ordered list and unordered list.	
5.	Create a web page to link:	
	a. A different web page of same site.	
	 A different location on the same web page. A Specific location on different web page of same site. 	
6	Create a webpage which includes photos and align with the ALT property on the left	t right and
0.	center	it, fight, and
7	Insert images on web page using various attributes and set image as background	
8.	Create a webpage containing any image and add a hyperlink to another webpage. Us	e width and
	height property for an image.	
9.	Create table within table and also insert an image within the data elements of the table	e.

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

	Types of optical fibers, Advantages of optical fiber communication, Applications	
	of optical fiber in Medical, Communication, Entertainment, Data Security.	
3.	Quantum Physics: de-Broglie hypothesis of matter waves, de-Broglie wavelength for a particle accelerated by Kinetic Energy (K.E) and a charged particle accelerated by Potential difference (PD) "V", (Simple Numerical), Properties of matter waves, Heisenberg's uncertainty principle for wide wave packet and narrow wave packet (Simple Numerical), Tunneling Effect, Engineering applications - Scanning Tunneling Microscope (STM), Introduction to Quantum Computing.	4
4.	Semiconductor Physics: Classification of solids on the basis of band theory, Fermi level for metal and semiconductor, Position of Fermi level in extrinsic semiconductors (only diagram), Solar cell: principle, working, IV-characteristics, Efficiency and fill factor, Factor to improve efficiency of solar cell, Application, advantages and disadvantages of solar cell, Hall effect: derivation for Hall voltage and Hall coefficient (Simple numerical).	5
5.	 Ultrasonic and Non-destructive Testing: Ultrasonic- Properties of ultrasonic waves, Piezoelectric effect and inverse of piezoelectric effect, Generation of ultrasonic waves by inverse piezoelectric effect (using transistor), Compressibility of liquid by using ultrasonic waves (Simple Numerical). Non- Destructive Testing (NDT): Definition and its objectives, Difference between destructive testing and non-destructive testing, Application of NDT as an Ultrasonic flaw detection technique (Simple numerical), Advantages of NDT. 	4
6.	 Nanophysics and Superconductivity: Nanophysics- Introduction of nanophysics, Properties of nanoparticles (Optical, Electrical, Mechanical), Applications of nanomaterials in Electronics, Automobile, Medical. Superconductivity- Definition of superconductivity on the basis of temperature dependence of resistivity, Properties of Superconductors, Meissner effect, Critical magnetic field (Simple Numerical), Type I and Type II Superconductors, Engineering applications of superconductivity in Superconducting Quantum Interface Device (SQUID) with its principle, working, general application of superconductors, medical, principle of Maglev train. 	5
	TOTAL	28
List of	f Experiments:	
Perfor	rm any 08 experiment out of 12:	
1.	Experiment based on Newton's rings (determination of wavelength of monochron	natic light,
	determine radius of curvature of Plano-convex lens).	
2.	Experiment based on polarization (To verify Law of Malus).	
3.	Determination of refractive index using Brewster's law.	
4.	Experiment based on Double Refraction (Determination of refractive indices / Ident	ification of

types of crystal).

NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

- 5. Experiment based on Laser (Determination of thickness of wire / Number of lines on grating surface).
- 6. Determination of Planck's constant using available experimental setup.
- 7. To study IV characteristics of Solar Cell and determine parameters (fill factor and efficiency).
- 8. To determine Hall coefficient and charge carrier density.
- 9. Determination of velocity of ultrasonic waves and compressibility of given liquid by using Ultrasonic Interferometer.
- 10. An experiment based on optical fiber. (To determine the numerical aperture acceptance angel acceptance cone of optical fiber of laser diode.
- 11. Experiment based on semiconductor (To determine the temperature dependence characteristics of semiconductor).
- 12. To determine the unknown wavelength by using plane diffraction grating.
- 13. Study visit to research laboratory/ facility and submit report (Compulsory).

Course	e Contents:										
T T •/	D								Duration		
Unit	Description								(Hrs.)		
	Introduction to	Computer	Systems:								
	Overview of C	omputers: 1	History of	compute	rs (evoluti	ion and k	key miles	tones),			
	Types of compu	ters: Analog	g, Digital, 1	And Hyb	rid.						
	Applications of	Computers	: In educat	tion, heal	thcare, bus	siness, ent	tertainme	nt, and			
1.	other fields. Co	mponents of	of a Comp	outer Syst	em: Hardy	ware vs.	Software,	Basic	4		
	hardware components (CPU, memory, storage, input/output devices).										
	Introduction to Operating Systems: Functions (process, memory, file system, device										
	management),	Types (bat	ch, time-s	sharing,	real-time,	distribut	ed, embe	edded),			
	Structure (Kerne	el, Shell, Sy	stem Utilit	ies).							
2.	Computer Arcl	hitecture an	nd Organi	zation:			1		4		
	Basic Structure	ot a Compu	ter: Von N	eumann a	architecture	e, instruct	ion cycle.				

ZEAL COLLEGE OF ENGINEERING & RESEARCH, PUNE – 41

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

	CPU Organization: ALU, Registers, Control Unit. Buses and Interfacing: Overview					
	of data transfer methods (bus organization, control lines). Memory Architecture:					
	Memory hierarchy, RAM, ROM, Cache, Virtual Memory.					
	I/O Systems: I/O devices, I/O addressing, and basic concepts of interrupts and DMA.					
	Display Technologies: Explore different display types (CRT, LCD, LED), display					
	technology fundamentals, resolution, and refresh rate					
	Data Communication and Networking Fundamentals:					
	Data Communication: Types of data transmission, Modes (Simplex, Half-duplex,					
	Full-duplex), Transmission media (Wired, Wireless)					
3.	Network Topologies: Bus, Star, Ring, Mesh, Hybrid. Types of Networks: LAN,	5				
	WAN, MAN, PAN. Overview of Networking Devices: Switches, Routers, Modems,					
	Hubs, Repeaters					
	Introduction to the Internet: Basics of how the internet works, Internet protocols					
	Networking Models and Protocols:					
4.	OSI Model: Layers and functions. TCP/IP Model: Layers and comparison with OSI.					
	IP Addressing: IPv4, IPv6, Subnetting, CIDR. Network Protocols: HTTP, FTP,	5				
	SMTP, DNS, DHCP, ICMP.					
	Packet Switching vs. Circuit Switching: Fundamental differences and use cases.					
	Introduction to Network Security:					
	Fundamentals of Network Security: Threats, Attacks, Vulnerabilities.					
	Cryptography Basics: Symmetric and Asymmetric Encryption, hashing.					
5.	Firewalls and Intrusion Detection Systems (IDS): Working principles of firewalls	5				
	and intrusion detection systems. Security Protocols: SSL/TLS, IPSec, VPN.					
	Authentication and Access Control: Overview of methods such as passwords,					
	biometrics, multi-factor authentication.					
	Emerging Trends in Computer Systems and Networking:					
	Cloud Computing: Basics, service models (IaaS, PaaS, SaaS), deployment models					
_	(public, private, hybrid). Virtualization: Concept of virtual machines, hypervisors.	_				
6.	Internet of Things (IoT): Architecture, Applications, Challenges. 5G Networking:	5				
	Features, use cases, and its role in modern communications. Edge and Fog					
	Computing: Concepts and Applications.					
	Data Centers: Fundamentals, architectures, and their role in modern computing.					
TOTAL						
List of	'Experiments:					

Group A: Fundamentals of Computer Systems: (Any 8)

- 1. Disassemble and identify key components of a computer system (CPU, RAM, motherboard, storage, etc.). Discuss functionalities and basic maintenance practices.
- 2. Use a simulator to demonstrate the instruction execution process in a CPU and explore the memory hierarchy (RAM, cache, virtual memory). **Open-source software**: SimulIDE, Little Man Computer Simulator.
- 3. Create a diagram of a motherboard, labeling key components (CPU socket, RAM slots, expansion slots, connectors) and explaining their functions. **Open-source software**: <u>Dia</u>, <u>Fritzing</u>.
- 4. Install and configure an expansion card (e.g., graphics card or network card) in a computer.
- 5. Compare HDD and SSD by conducting performance tests (e.g., read/write speed tests). **Open-source software**: CrystalDiskMark, <u>KDiskMark (Linux)</u>

ZEAL COLLEGE OF ENGINEERING & RESEARCH, PUNE - 41

(An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

6.	Install an operating system (e.g., Windows, Linux) on a computer.							
	Open-source software: Ubuntu, Fedora.							
7.	Benchmark a GPU using a graphics-intensive application and analyze its performance.							
	Open-source software: Unigine Heaven Benchmark, GLMark2							
8.	Compare different display technologies (CRT, LCD, LED) in terms of resolution, refresh rate,							
	and overall quality.							
9.	Diagnose and resolve a hardware or software problem in a computer system.							
	Open-source software: <u>HWiNFO</u> , Speccy.							
10	. Install and configure antivirus software, demonstrating its features.							
	Open-source software : <u>ClamAV.</u>							
Grouj	p B: Fundamentals of Networking: (Any 5)							
1.	Set up a small LAN and demonstrate data transfer between devices.							
	Open-source software: Wireshark, EtherApe							
2.	Configure a switch and a router for a network, demonstrating their roles in data communication.							
	Open-source software : Cisco Packet Tracer, <u>GNS3.</u>							
3.	Simulate data transfer using the TCP/IP model and analyze packet data.							
	Open-source software : <u>Wireshark.</u>							
4.	Create a presentation on common malware and viruses, including preventive measures and real-							
	world examples.							
5.	Research and create a report on different data center topologies and architectures (e.g., star, mesh,							
	tree).							
6.	Conduct a case study of a specific data center or take a virtual tour of a data center, highlighting							
	key components and their functions.

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

	Flow Control Structures: Conditional statements, Iterative Statements, Transfer	
	control in python.	
3.	Strings: Introduction of string, Access Characters of a String, Behavior of Slice Operator, Slice Operator Case Study ,Mathematical Operators for String , len() in-built Function ,Checking Membership, Comparison of Strings, Removing Spaces from the String ,Finding Substrings, Counting substring in the given String, Replacing a String with another String, Splitting of Strings ,Joining of Strings, Changing Case of a String, Checking Starting and Ending Part of the String, Check Type of Characters Present in a String, Formatting the Strings, Important Programs regarding String Concept.	4
4.	List and Tuple: List: Creation of List Objects, Accessing Elements of List, List vs Mutability, Traversing the Elements of List, Important Functions of List, Using Mathematical Operators for List Objects, Comparing List Objects, Membership Operators, clear () Function, Nested Lists, List Comprehensions. Tuple: Tuple Creation, Accessing Elements of Tuple, Tuple vs Immutability, Mathematical Operators for Tuple, Important Functions of Tuple, Tuple Packing and Unpacking, Tuple Comprehension, Differences between List and Tuple.	5
5.	Set and Dictionary: Set: Creation of Set Objects, Important Functions of Set, Mathematical Operations on the Set, Membership Operators: (in, not in), Set Comprehension Dictionary: How to Create Dictionary, Access Data from the Dictionary, Update Dictionaries, Delete Elements from Dictionary, Important Functions of Dictionary, Dictionary Comprehension. Difference between set and dictionaries	5
6.	 Function and Module: Functions: Types of Python Functions, defining a Python Function, Calling a Python Function, Syntax, Python Function Arguments, Lambda or anonymous function, Scope of function. Module: Introduction to modules, Introduction to packages in Python, Introduction to standard, library modules 	5
	TOTAL	28
List of	Experiments:	

Perform any 12 experiments:

- 1. Install Python and an IDE/text editor. Write a simple Python program to print "Hello, World!" on the console.
- 2. Create variables of different data types (integers, floats, strings, Booleans) and perform arithmetic operations on them.
- 3. Write a Python program that takes user input, performs a calculation, and prints the result.
- 4. Write a program to determine if a given number is positive, negative, or zero using if-elif-else statements.
- 5. Write a program to find the largest number among three numbers using nested if-else statements.
- 6. Define a function that calculates the factorial of a number and call it from the main program.
- 7. Write a function that takes a list of numbers as input and returns the sum of all elements.

ZEAL COLLEGE OF ENGINEERING & RESEARCH, PUNE – 41 (An Autonomous Institute Affiliated to Savitribai Phule Pune University) NAAC Accredited with A+ Grade / ISO 21001:2018

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

- 8. Implement a lambda function to square a given number.
- 9. Create a module that contains functions to perform basic arithmetic operations and import it into another Python script.
- 10. Use the math module to calculate the area of a circle given its radius.
- 11. Write a program to sort a list of integers in ascending order.
- 12. Write a Python program to concatenate two tuples and display the result.
- 13. Write a program to find the intersection of two sets.
- 14. Write a program to reverse a given string.
- 15. Write a program to count the occurrences of a specific character in a string.
- 16. Write a program that formats a given string to display it with a specified width.
- 17. "Implement a mini-Project on the basis of python knowledge

Ex:

- 1. Calculator Application
- 2. Number Guessing Game
- 3. Palindrome Checker
- 4. Word Counter"
- 18. Write a python Program to Print Different Pattern.
- 19. Write a python Program for finding even numbers from given list using List Comprehensions.

# DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

standard format must be duly signed by the authority, should be addressed to the HR manager or relevant authority.

- 5. **Confirmation Letter:** Students must submit the confirmation letter from the industry, research organization, or collegiate club to the Internship Coordinator and the Head of Department (HOD) office.
- 6. **Joining Report:** Upon commencing the internship, students must submit the joining report, joining letter, or a copy of the confirmation email to the Internship Coordinator and the HOD office.
- 7. **Faculty Mentor:** A faculty member will be assigned as a mentor to a group of students. The mentor will be responsible for monitoring, evaluating, and assessing student internship activities. The faculty mentor is also required to visit the internship location and submit formal feedback to the Internship Coordinator.
- 8. **Faculty Visits:** Faculty members are advised to visit the internship site once or twice during the internship period to monitor progress.
- 9. **Progress Report:** Students must submit progress report fortnightly to their faculty guide and the final internship report to the Internship Coordinator and department office.
- 10. **Evaluation Report:** After the completion of the internship, the mentor, along with the assessment panel members, should submit the evaluation report of the students to the department office and the Internship Coordinator.
- 11. **Internship Certificate:** Students must receive the Internship Certificate from the industry and submit it to the Internship Coordinator and department office.
- 12. **Presentation and Assessment:** Students are required to give a presentation on their internship work as part of the term work. The internship diary and report will also be verified and assessed.
