Technical inspection of all participating teams was done on day one in which Kart was inspected by experts from Automotive Industry. In technical inspection Kart was tested to check whether it is manufactured according to specification given in the rulebook or not. After successful completion of Technical Inspection teams were eligible for the brake test.

Design Report VS Vehicle Analysis

The vehicle will be verified with the design report and not even a single alteration would be entertained in the vehicle from the design report.

Dynamic Tests

BRAKE TEST

It was mandatory for a vehicle to pass the brake test to participate in any of the dynamic events. The brake test was conducted on 8m straight course of track with speed of 40km/hr while attempting brake test.

The vehicle must stop in a straight line after the brake is applied on the vehicle and the wheels on which the brake mechanism is acting must get locked immediately after pedal is pressed as well as break light must blink. Each vehicle was given only three attempts to pass the brake test. Vehicle dynamic stability was also checked during the test. Only two teams were disqualified in brake test.

Acceleration Test

The acceleration of the kart was evaluated during the brake test. Acceleration of the vehicle in attempt in which the vehicle is passing brake test was considered as final.

Autocross

The objective of the autocross event was to evaluate the vehicle's maneuverability and handling qualities on a tight course without the hindrance of competing vehicles. The autocross track was designed to evaluate combined performance features of acceleration, braking, and cornering ability.

Endurance

The Endurance Event was conducted on day 3. It was designed to evaluate the overall performance of the vehicle and to test the vehicle's reliability.

Skid Pad

The objective of the skid-pad event was to measure the vehicle's cornering ability on a flat surface while making a constant-radius turn. The skid pad layout was a figure of 8
