## About STTP

The main purpose of the STTP is to train the participants in the concept of subject, its objectives and expected outcomes. Considering the vision, mission of the institute and requirements of student, we have designed a faculty-responsive STTP which will lead to positive transformation in teaching learning process. In educational institutes, everyone is aware about the gradual increase in classroom absenteeism of students has become the matter of concern. Students are reluctant to attend classes because Lectures content delivered by faculties are available in textbook or on internet in the form of videos/PPTs/MOOC, being one of the reasons. In order to address this issue, this STTP brings you an opportunity to pursue academic excellence during interactive sessions where eminent hardcore teachers will explain various topics of SPPU syllabus by giving us a better idea and what we should focus on syllabus wise so as to make your lecture more effective and interactive.

## About Zeal College of Engineering

Zeal Education Society's Zeal College of Engineering and Research (Formally Known as Dnyanganga College of Engineering and Research) is established in June 2007 which symbolized the beginning of new era in technical education. The Institute has been approved by AICTE, DTE and affiliated to Savitribai Phule University, Pune. The Institute offers undergraduate and postgraduate Engineering degree programmes in information Technology, Computer, Electrical, Mechanical, Civil and Electronics & Telecommunication. The institute is also granted as PhD research center in Electronics & Telecommunication and Mechanical Engineering under Savitribai Phule Pune University, since 2013. Well qualified and experienced faculties with good research background are one of the key features of the institute. With state of art research, infrastructural, sports, cultural facilities the campus provides excellent academic ambience for the students. Dedicated Training and Placement cell of the institute ensures a bright future to its students.

## About Zeal Education Society

Zeal Education Society (ZES) is established in year 1996 under the able guidance of Hon. Shri S. M. Katkar to noble cause of education. During last few years, ZES has proved for being a well known organization in the field of education. Within the time span of 20 years, ZES has established Dnyanganga English Medium school, Dnyanganga Junior college, Dnyanganga college of education, Silver Crest School at Hingane Campus and Zeal College of Engineering and Research, Zeal Polytechnic, Zeal Institute of Business Administration, Computer Application & Research, Zeal Institute of Management of Computer Application at Narhe Campus.

## "RESEARCH TRENDS IN DESIGN AND ANALYSIS OF ALGORITHMS WITH R-PROGRAMMING" December 04<sup>th</sup> to 08<sup>th</sup>, 2017

### About Department:

Department of Computer Engineering is like prism reflecting the manifold shades of learning and co-curricular activities and determined towards the goal of providing innovative and quality education with high standard to achieve academic excellence. The Department is facilitated with state of the art infrastructure and well equipped laboratories. Thus we are confident that our students will emerge as assets not only to this institution and to the organization they belong, but also to the country at a large.

### About STTP:

Design and Analysis of Algorithm is a systematic way of writing algorithms. It is increasingly being applied in the practical fields of mathematics and computer science. This STTP is intended to elaborate the fundamental concepts like Divide & Conquer, Greedy Algorithms, Dynamic Programming, Backtracking, Branch & Bound along with the tractable and intractable problems. This STTP is also focusing on various algorithms used in data analysis using R programming and Machine Learning.

### Contents of STTP

Short Term Training Program is intended to explore the knowledge and techniques in following areas of Design and Analysis of Algorithms (DAA).

- DAA Fundamental
- Model and Abstract Algorithms
- Complexity Theory
- About R Programming
- Hands on R Programming
- Decision tree and Naive Bayes classifier
- Applications of Machine learning
- Pattern recognition and classification

### Objectives

To provide new insights and knowledge on STTP topic by interacting with the senior Faculty Members/Scientists and Experts of the respective field.

- To study the fundamental concepts of Design and Analysis of Algorithms
- To discuss the problem solving abilities using mathematical theories
- To discuss the concepts of Computer algorithms to find the optimal solution
- To discuss the concepts of analyzing the performance of algorithms
- To discuss the concept of P & NP problems
- To study the implementation of innovative and effective teaching learning methodologies for imparting the course knowledge amongst the students/learners of the subject
- To formulate problems precisely, solve the problems, apply formal proof techniques, and explain the reasoning clearly
- To discuss applications of DAA, R-programming & Machine Learning

## “RESEARCH TRENDS IN DESIGN AND ANALYSIS OF ALGORITHMS WITH R-PROGRAMMING “

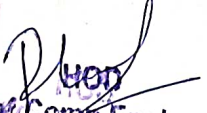

One week National level Short Term Training Program on “RESEARCH TRENDS IN DESIGN AND ANALYSIS OF ALGORITHMS WITH R-PROGRAMMING” was organized by Department of Computer Engineering of Zeal college of Engineering and research during 4<sup>th</sup> to 8<sup>th</sup> Dec 2017. Total 34 participants from various engineering institutes and industries across Maharashtra state had participated in this workshop.

The aim of this STTP was to bring active and emerging topics of Design of algorithms to describe our beliefs about how the world functions. In mathematical modeling, we translate those beliefs into the language of mathematics. There is a large element of compromise in mathematical modeling. The majority of interacting systems in the real world are far too complicated to model in their entirety. Mathematical modeling can be used for a number of different reasons.

Design and Analysis of algorithm is systematic way of writing algorithms. It increasingly being applied in the practical fields of mathematics and Computer Science. This STTP is intended to elaborate the fundamental concept like Divide & Conquer, Greedy Algorithm, Dynamic Programming, Backtracking, and Branch & Bound along with the tractable and intractable problems. This STTP is also focusing on various algorithms used in data analytics used in data analysis using R programming and Machine learning.

### Objectives:

- To study the fundamental concept of Design and analysis of algorithm.
- To discuss problem solving abilities using mathematical theories.
- To discuss concept of computer algorithms to find the optimal solution.
- To discuss concept of analyzing the performance of algorithms.
- To discuss concept of P & NP problems.
- To study the implementation of innovative and effective teaching learning

methodologies for imparting the course knowledge amongst the students /learners of the subject.

- To formulate problems precisely, solve the problems, apply formal proofs techniques and explain the reasoning clearly.
- To discuss applications of DAA, R programming Machine Learning.
- To explore the concepts of discrete mathematics with its Engineering Applications.
- To provide new insights and knowledge about the topic through close interactions/discussions with the senior Faculty Members/Scientists and Experts of the respective field.
- To study how discrete objects combine with one another.
- To understand how computer implementations are significant in applying ideas from discrete mathematics to real world problems.
- To learn appropriate use of set, function and relation models to understand practical examples, and interpret the associated operations and terminologies in context.
- To determine number of logical possibilities of events and to learn logic and proof techniques to expand mathematical maturity.
- Formulate problems precisely, solve the problems, apply formal proof techniques, and explain the reasoning clearly.

**Session:-** Morning/Evening

**Content:-**

- 1) Origin of Computational Taught
- 2) Computability, Electronic Computer, Computational Complexity
- 3) Efficient Computation by abstract computational model compared to efficient computation in physical.

**\* Characteristics of Algorithm:**

Computation:- It is one step to solve computational problem.

Examples: i) Numerical Computation

ii) Word Processing

iii) Physical Phenomena- like weather evolution, evolution of stars.

**\* Asymptotic Analysis in Algorithm**

-What is Asymptotic Analysis?

-Notations in Asymptotic Analysis (Big oh, omega , theta etc)

-Examples, Trichotomy law followed?

-Why Asymptotic analysis of algorithm?

-Input instance set and time complexity depends on instance structure

**\* Finding limitation of our computer**

-Turing Machine

-Von Neumann architecture and Turing Machine

-Turing Completeness

-Electronic Computers and turing completeness.

-Computability and complexity

-Algorithm performance in terms of TM operations.

**\* Formal definition of a computational problem.**

-Types of problems:- Decision , search, Counting, Optimization, Function Problem.

**Day-5 [06 Hours]**

**Resource Person:** Prof. S.P. Pundalik

**Session:-** Morning

**Content:-**

**\* Why Decision Problem**

**\* Moving from other problem types to decision version**

Examples: Primarily Testing, Graphs Problem

**\*Difference/ similarity between language, Problem, algorithm, Turing Machine.**

**\* Efficient Computation**

-Drawing boundary between efficient and non-efficient computation.

-polynomial time vs super polynomial time functions.

-Coham-Edmonds thesis of characterizing. efficiency practically.

Determinism vs Non-Determinism

**\*Formal Definitions:-Time complexity**

-Time complexity of a turing machine on an instance  $i$  of problem  $x$

**Day-5 [06 Hours]**

**Content:-**

- **Introduction to R programming**
- What is in R code?
- What is a factor in R?
- Basic Syntax
- Data types
- R Variables
- R operators
- R decision making
- Loops
- Functions
- R-Strings
- R- Vectors
