In this session the committee member of the Program Prof. Saleha Saudagar introduced the expert Mr Muhammad Azhar Shaikh for technical sessions to the participants. Introduction about AWS Services was demonstrated by Session Speaker. As we are aware that AWS is Giant Cloud Provider with lot of services on board.

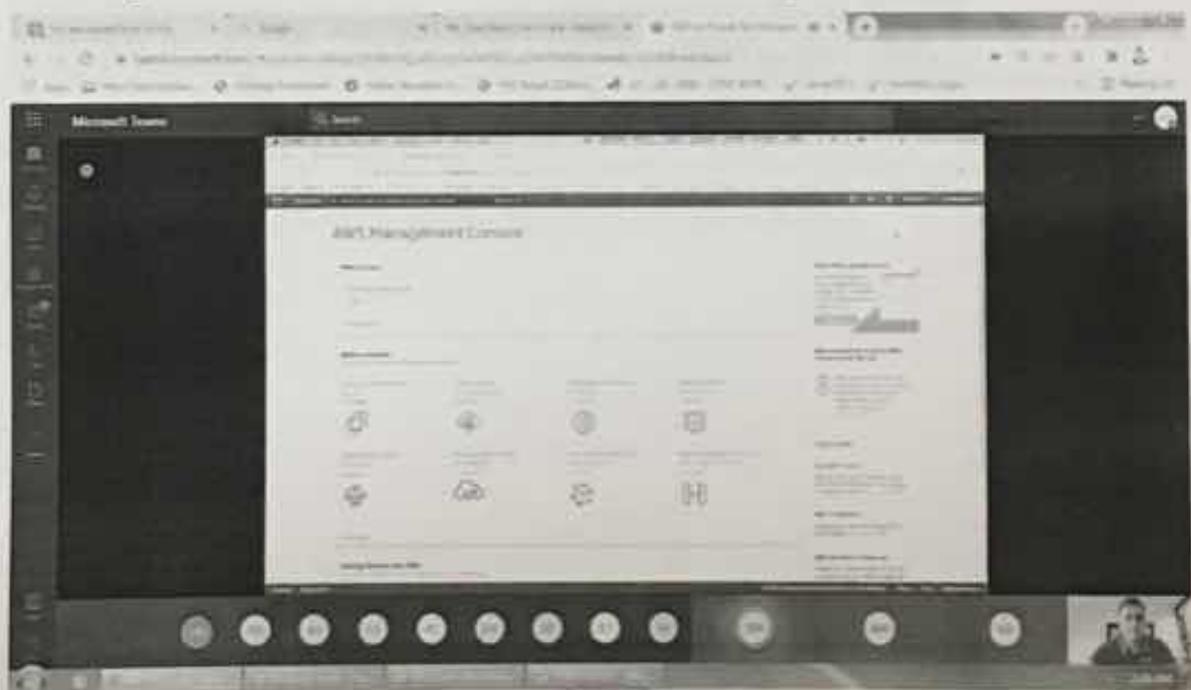

The greatest property of Cloud Computing is scaling, which expands in horizontal as well as vertical way was well explained to participants.

The cloud service models are categorized in On-Premises, IaaS, PaaS & SaaS Models. Demonstration of AWS Dashboard with the available was made familiar to participants. User need to register for the services and can view the services through Console.

Mr Muhammad Azhar Shaikh had demonstrated about how to create an instance from AWS service portal by choosing appropriate options of Availability Zone, Instance Type, Region & Storage.

AWS helps user to achieve virtualization by Virtual Private Cloud by selecting DC, AZ and Regions. The Steps to create an instance was well demonstrated by Mr Azhar in the session. Understanding authorization and authentication is very important concept which was focused through the presentation understanding Security groups was well demonstrated in the session.

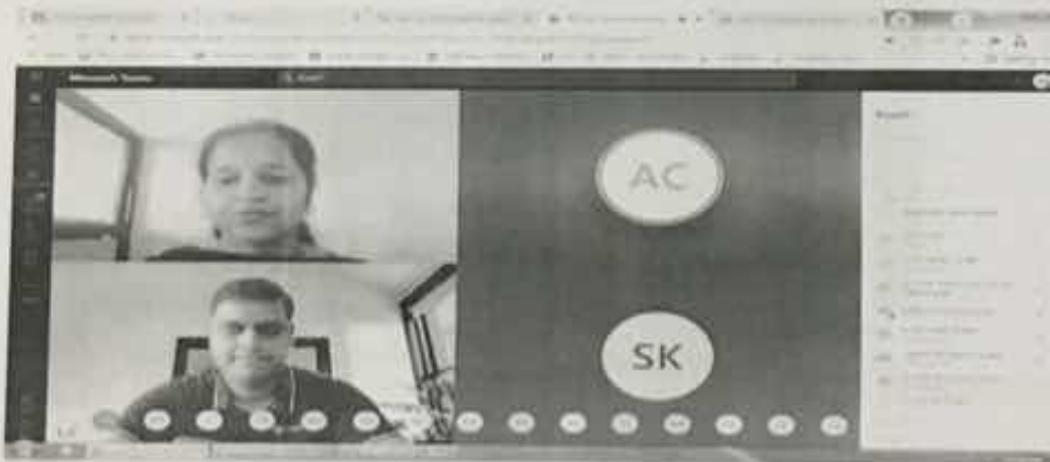

After successful creation of Linux Instance, it appears as follows: Another service to create a AWS S3 bucket was practically demonstrated by Mr Azhar as follows.

It need to follow certain policies for creating Bucket. AWS partners with different no Networks as AWS Partner Network for continuous non-stop business. When talking about HADOOP the emerging concept of Map-Reduce which processes the task by dividing it, Shuffle, Sort and provide the output in reduced format is major part of Cloud Computing was well demonstrated at end of the session.
